ANCIENT DITCH STILL GOOD

Made by Prehistoric Race, Arizona
Farmer Uses Several Thousand
Feet of It.

There exists in several parts of
Arizona the remains of irrigation sys-
tems that date back to prehistoric
days, when quite highly civilized In-
dian tribes inhabited these valleys.

One of the most famous of these
ancient irrigation works is on the
Arizona state highway from Prescott
to the Grand Canyon. Water has taken
from what is known as Monte-
zuma's well, a curious natural well
440 feet in diameter and 93 feet deep,
except in one spot, where no bottom
was reached at 500 feet.

The water carries a great deal of
lime in solution, and the sides of the
ditch have been preserved by the petrifi-
cation of the original earth. One
rancher at the present time is using
several thousand feet of the old
ditches, after merely cleaning them out.

F. R. Goodman, state highway divi-
sion engineer, was once tempted by
curiosity to run a line of levels along
the bottom of one of these old Indian
ditches. He found the grade to be al-
most perfectly uniform at a rate of
0.01 foot per 100 feet.—Engineering
News.

OLE BULL DID QUEER THINGS

Famous Scandinavian Violinist Makes
Egyptians Fall to Their Knees
and Pray.

Ole Bull was constantly doing
unique things which kept him in the
limelight. In the latter years of his
life he played the violin on one occa-
sion at the summit of Cheops, the
highest pyramid in Egypt. He was at-
tended only by a few friends and a
bodyguard of Egyptian guides. When
the brilliant tones of the violinist's
Cremora rang out in the dry, sunlit
Egyptian air, it is said the Egyptians
present were so surprised and fasci-
nated that they fell on their knees,
and called on the name of Allah.

Ole Bull was a giant in stature, and
the ordinary full-sized violin looked
like a toy in his hands. He used a
bow two or three inches longer than
ordinary, owing to the length of his
arm. His fondness for playing lengthy
passages in broken chords of three and
four notes caused him to use a very
flat bridge, which, while it facilitated
his chord playing, made it difficult to
produce much tone on the inner strings
in the higher positions.

Most Popular Library.

Close after the discovery that New
York is the greatest city in the world
comes the report that its public library
is the most used library on earth. Its
daily average number of readers is
double that of the British Museum of
London or the Bibliotheque Nationale
of Paris, according to the report for
1915, just published, which says that
10,384,479 books were borrowed in the
year and that 2,557,717 persons en-
tered the central building at Fifth
avenue and Forty-second street. The
war has brought a great increase in
the number of people who use the li-
brary for research. It has become,
the director says, an immense labora-
tory for scientific investigation, particu-
larly those seeking information regard-
ing new industries.

The Finishing Touch.

Harry had become much interested
in playing soldier. At first he was con-
tent to march about merely with a stick
for a gun. Then, at his request, his
mother made him a paper hat, to which
later she added a plume which Harry
had discovered in a neighbor's chicken
yard. After a time he found he must
have a belt, with a sword.

One day he confronted his mother,
dressed in all his warrior's finery.

"Why how like a soldier you look!"
she exclaimed.

"Yes," he agreed, "but I've been
looking at a picture of Napoleon, and
he has scrubbing brushes on his shoul-
ders."

It Altered the Case.

A tourist walking along a quiet
Irish country road came upon two men
fighting desperately and rolling in the
dust of the wayside.

The upper man was pummeling the
under man mercilessly, and the specta-
tor thought he ought to interfere.

"I say, old chap," he began expostu-
lating, "it's not playing the game to hit
a man when he's down, you know!"

The victor paused a moment, and
raised his head.

"Faith," said he, "an' if yez knew all
the trouble I had getting him down
yez wouldn't be talkin' like that!"

Gas Torch.

Kindling is saved by the use of a
gas fire-lighting device. This lighter
consists of a pipe of suitable length,
at one end of which is a gas burner.
The opposite end of the pipe is con-
nected with a gas burner by means of
a gas tubing. To start the fire the torch
is placed under the grate, and kept
in place until the coal ignites.

Short Lived Wires.

It has been found that telegraph
wires will last for 40 years near the
seashore, but in the manufacturing
districts the same wires will last only
ten years, and sometimes less.

Couldn't Trust Her.

"Cheer up, old man! Absence, you
know, makes the heart grow fonder."
"What's worrying me is that I'm not
just sure that it's having the same ef-
fect on the girl."
